Professional Summary

I am a results-driven software developer passionate about developing user-friendly software applications. I possess excellent problem-solving skills and can perform well in a team. I seek to help organizations develop their product as a software engineer and as well as grow and develop my own skills.

Experience

Salesforce Commerce Cloud Developer – April 2022 -Present | Nexum AG

- Member of a team adding new features to the online shop of a big jeweler in Europe serving over 900,000 clients per month.
- I wrote and configured service scripts to interface with external systems.
- I wrote and configured job steps and jobs to run asynchronous tasks.
- I extended system objects to implement new client requirements.
- I created new custom object types to implement new client requirements.
- I integrated customer data with Salesforce CRM.
- I extended the customer registration process to include email verification processes.
- I built new pages from the page designer tool for new features.

Salesforce Commerce Cloud Developer – June 2021 – March 2022 | Nexum AG

- Member of a team which built an SFCC based ecommerce platform for a furniture selling client.
- Built custom cartridges for highly reusable and configurable page designer components such as modals, input boxes and video widgets based on bootstrap 4.
- Wrote hooks functions to inject structured data for various schema types based on specifications on schema.org and Google search central through velocity templates to increase website search index and visibility to web crawlers.
- Built a react application based on the lighting web design components which was used as a business manager module to help merchandisers and administrators easily manage custom object types through a custom SDK built with OCAPI endpoints.
- I worked on configuring the site in different locales. The site was configured for English and German languages. Built and configured a multi locale site with catalogue, products and price list in English and German.

Frontend Engineer, Fleri - February 2022 – August 2022 | Freelance

- I built the Fleri Health Onboarding, Sponsor Dashboard and Admin Dashboard with Next JS and TypeScript.
- I built reusable UI components and pages with Chakra UI.
- I added and configured Redux Toolkit for state management and RTK Query for data fetching to the Fleri applications.

Mobile Development - 2020 | Freelance

- Built a mobile banking application based on React Native and Expo. (Under active development).

Content Management Systems - 2018 | University of Energy and Natural Resources

- Assisted with the building of a university website using the WordPress content management system.

Education

BSc Computer Science | November 2017 | University for Development Studies

Training / Short Courses
